Service Certificate
To whom so ever may be concerned

This is to certify that we have purchased the Sweet Sorghum Juice Extractor (3 roller), 600 kg/h crushing capacity, 5 hp motor standard make ISI with all essentials accessories from Shri Praveen R. Sharma of M/s Adarsh Engineering Works, Nagpur under the world bank funded NAIP project namely “Value of chain model for bioethanol production from sweet sorghum in rainfed areas through collective action and partnership” in 2009.

The product supplied by the company is of highest quality. We have been using the crushing for last five years and its performance is excellence. We have not faced any problem during its crushing operation. The services provided by M/S Adarsh Engineering Works, Nagpur were very good. The equipment gave very good performance for extracting the sweet sorghum juice from single pass only. The quality of juice and bagasse obtained after crushing operation was also good.

M/S Adarsh Engineering Works led by Shri Praveen Sharma is doing very good customer service onsite and post-sales. I strongly recommend the crusher can be utilized for any sweet sorghum/sugar cane jaggery based industries without any after sales service problems to the customer.
